

I believe XM Radio has a right to offer these services to their customers, as well as the customer's right to receive the services. I recommend that these people complaining & rallying against satellite radio to come up with a better plan for their radio stations to get more listeners, after all, that's what this is all about. Satellite radio can't be beat & it's putting a dent in the radio market. Hey radio market, get on board & come up with your own satellite service & stop trying to hinder ones already in existence.
